

Action Areas of World March of Women

Peace and Demilitarization

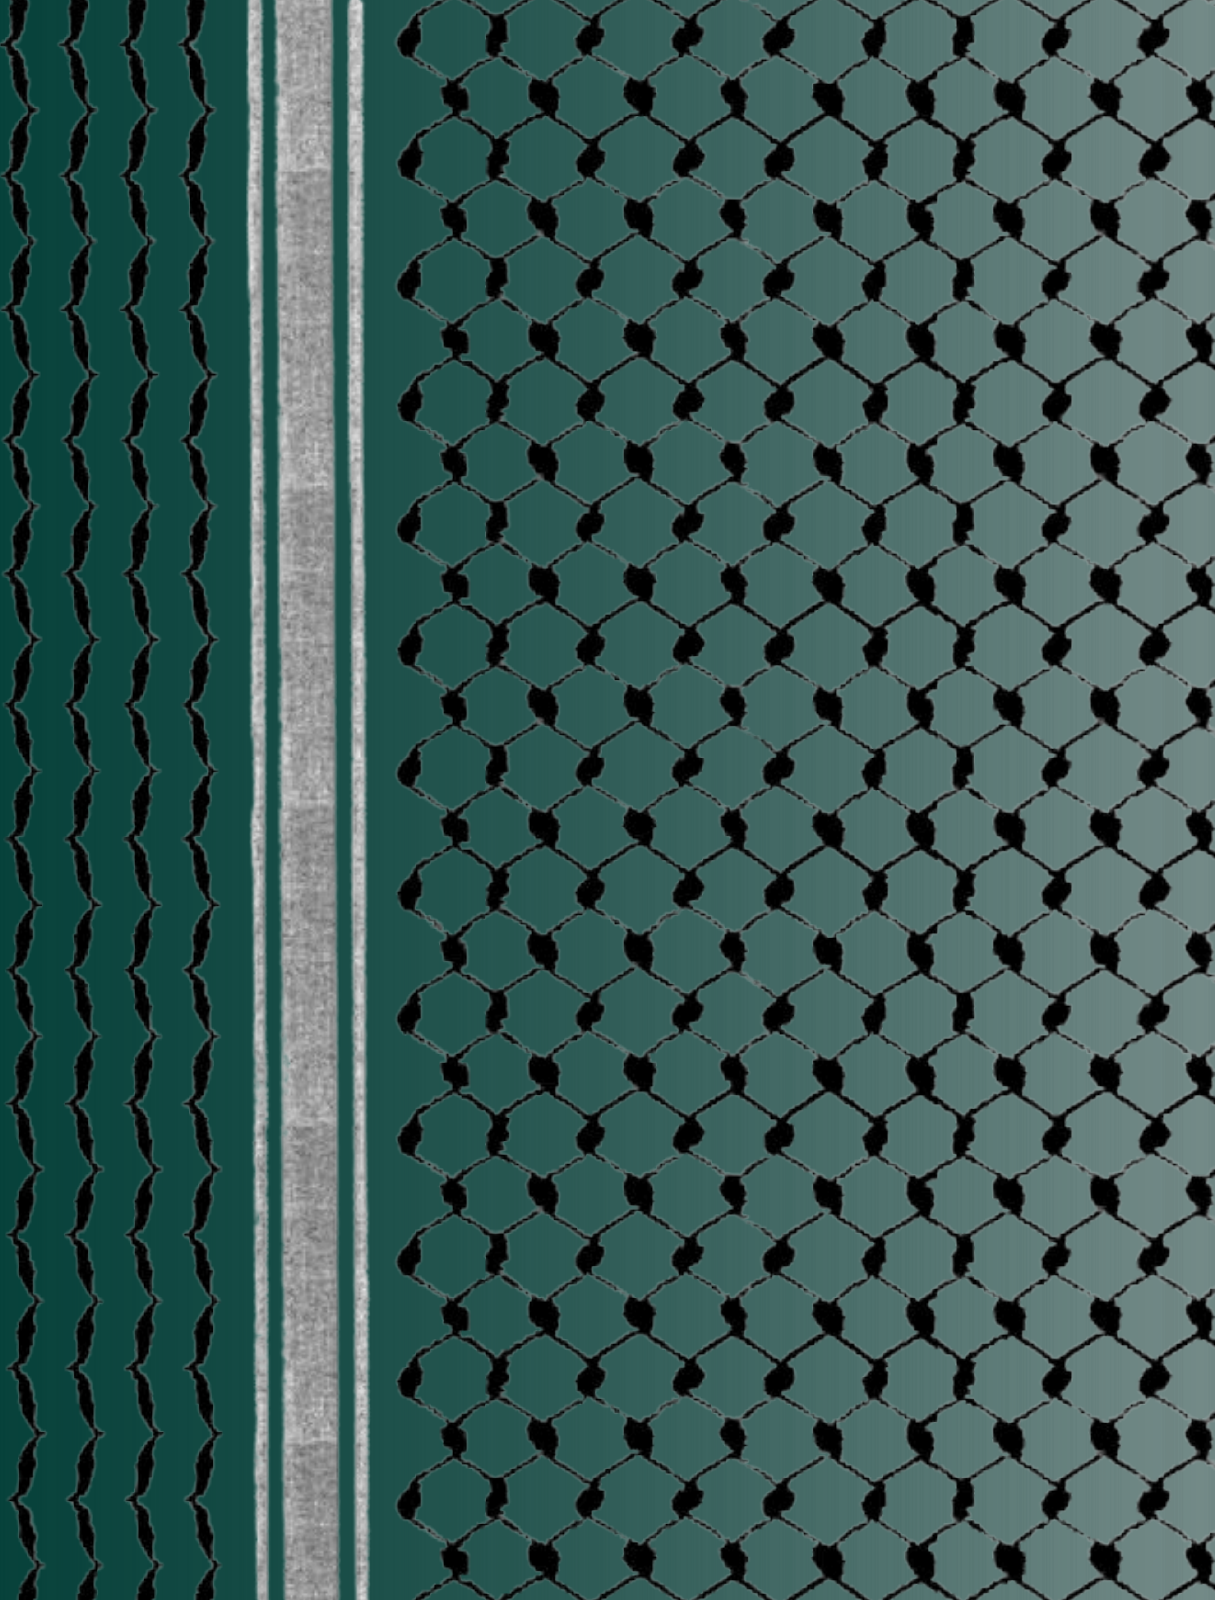

Our feminist vision claims that war, conflict, and militarisation are manifestations of heteropatriarchal capitalism, which creates patterns of destruction all over the world.

War and armed conflicts are a form of organized violence that we must define well to expose.

We condemn colonial conflicts, we condemn occupation conflicts, we condemn religious fundamentalist conflicts.

Never overlook the true reasons behind conflicts, never forget, and never normalize.

We denounce the genocide
of the Palestinian people
and the international
institutions' complicit in
their silence and inaction.

**We condemn
the Moroccan occupation
in Western Sahara.**

Within the heterosexual matrix of war, rape symbolizes an act of invasion and an instrument to displace and control populations.

**Stop the massacre and genocide against Alawites,
Prevent the abduction and abuse of women in Syria!**

War is tied to patriarchy and capitalism, our feminist vision calls for demilitarisation and demands a culture of peace that goes beyond the mere absence of war.

The lasting peace can only be achieved by deconstructing and transforming gender, class, race, and sexuality.

We are committed to building anti-patriarchal, anti-colonial, and anti-capitalist societies as a sustainable path towards a peaceful world.
